Hydrafacial Treatment Consent Form

Hydrafacial is the only hydradermabrasion procedure that combines cleansing, exfoliation, extraction, hydration and antioxidant protection simultaneously, resulting in clearer, more beautiful skin with little- to-no downtime.

The treatment is soothing, moisturizing, non-invasive and generally non-irritating. As with most procedures, visible results from HydraFacial will vary from person to person.

What to expect:

Your skin may experience temporary irritation, tightness, or redness. These are normal reactions that typically resolve within 72 hours depending on skin sensitivity.

You may experience tingling and stinging in the treatment area. These sensations generally subside within a few hours.

Client experience may vary. Some clients may experience a delayed onset of these symptoms.

You will likely see results immediately after treatment and your skin may feel smooth and hydrated for one to four weeks with appropriate home care to maintain results.

The skin is more susceptible to sunburn/sun damage. Avoid excessive sun exposure and use a minimum of SPF 40 sunscreen.

Do you have any of the following? (Saying yes does not necessarily preclude treatment)

- Active acne or infection in the treatment area
- Open lesion or cold sore
- Active sunburn
- Skin condition such as eczema, dermatitis, or rashes
- An autoimmune disease such as lupus
- A viral concern such as HIV or Hepatitis
- Anticoagulants Therapy
- Melanoma or lesions suspected of malignancy
- Pregnancy or lactation
- Neurological disorder such as epilepsy (LED light)
- Infection in the urinary system i.e. kidneys, bladder and urethra
- Crohn's Disease
- Hyperthyroidism
- Deep Venous Thrombosis
